### **Component Solutions Expands Production Capabilities with New Swistek® Lathe**

*Bristol, Rhode Island, January 22, 2013* – Component Solutions, Inc., a leading supplier of custom industrial components, announced today that it has installed a new Swistek Swiss-type CNC lathe at its manufacturing facility for faster turnaround times, an expanded range of parts, and greater production capacity to meet increasing customer demand.

The fully automated AB42 Swistek machine features 1 5/8” diameter capacity, lights-out operation, 14 live tools, and secondary operations for precise, dependable production of high quality products.

“As our customers’ needs have changed, we’ve evolved with them, and the addition of this Swiss-type CNC lathe is just the latest step in our continued commitment to find versatile, cost-effective solutions for problem parts,” said David Reardon, President of Component Solutions.

For more information about the range of parts Component Solutions offers, call 401-396-9299 or visit [www.compsolinc.com](http://www.compsolinc.com).
